APPRENTICESHIPS, TRAINING
AND NVQ ASSESSMENT

Together, let's create
a sustainable workforce
for the future.

A LITTLE INTRODUCTION

Construction Training Specialists (CTS) are an award winning training provider that operates across the United Kingdom.

We specialise within the construction sector and offer an impressive portfolio of Intermediate and Advanced qualifications accredited with CSkills Nocr, BPEC, BTECH, GQA and City and Guilds.

Our services includes apprenticeship training, assessment for experienced workers, individual training for those looking to upskill or retrain on a self-funded and funded basis, apprenticeship recruitment and training for the unemployed.

We work with all clients post sixteen who are looking to build a long term career in construction.

Established in 2003, CTS have continued to build strong working relationships with small and large businesses.

We are renowned for providing learners with the skills necessary to create long term sustainable careers in construction.

CTS have continued to subcontract with JTL Training who deliver Plumbing and Electrical Apprenticeships and CITB, the Construction Industry Training Board over the last few years.

Throughout time both organisations have sent through a large amount of learners in every academic intake.

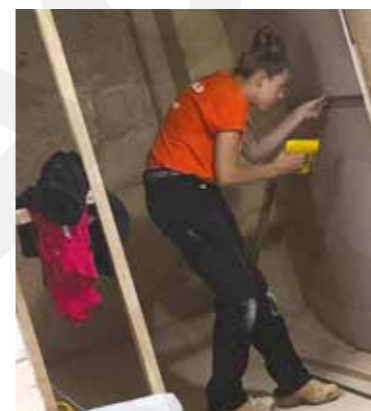

As a result of this we have secured a strong working partnership with both providers. Our dedication to our learners and hard work over time has rightfully earned us our own Skills Funding Agency contract.

What we offer:

- An impressive portfolio of Intermediate and Advanced qualifications
- Tutors with site experience
- NVQ Assessment for experienced site operatives
- Bespoke IQA Systems
- Self-funded and funded training courses

APPRENTICESHIP RECRUITMENT

CTS offer a free recruitment service for businesses looking to recruit apprentices. We assist employers by completing a training needs analysis, helping to identify what their business requirements are. Our services include writing job descriptions, advertising vacancies on behalf of the employers, pre-screening applicants and arranging final interviews and work trials with the employer.

APPRENTICESHIP TRAINING AND ASSESSMENT

CTS offer an extensive range of construction apprenticeships including frameworks and standards that are delivered at Intermediate and Advanced levels. Our timetable is delivered on a day release basis. Learners without previous industry knowledge or experience will

undertake an Intermediate qualification which may consist of an NVQ work based qualification, a Diploma, Functional Skills English and Maths (if applicable) and ERR (Employer Rights and Responsibilities).

On completion learners can progress on to an Advanced Apprenticeship (Level 3) qualification.

As well as catering for our own students, CTS also offer an assessment service for colleges struggling to find time within their academic timetable to deliver on site assessment for their students. This is something which can be a cost effective and stress-free solution.

ASSESSMENT OPTIONS FOR EXPERIENCED WORKERS

CTS offer two NVQ assessment routes aiming at experienced workers with no formal qualifications. Both options include the Experienced Worker Practical Assessment (EWPA) and On Site Assessment and Training (OSAT).

On successful completion of either assessment routes, candidates can apply for the appropriate CSCS card. EWPA is only available at NVQ Level 2 and OSAT can range from Level 2 – Level 6.

OSAT is aimed at those who have been working within the construction industry for three or more years. The assessment is targeted at candidates who already have the relevant skills and expertise, but have not achieved any formal qualifications. It is designed to enable individuals to achieve a recognised qualification without disruption to daily routines.

Entry requirements:

- More than three years' site experience
- Be working in a trade that is relevant to the qualification which has been chosen
- Be able to provide site evidence at the individuals place of work

EWPA is a method of off-site assessment which is available to bricklayers, carpenters and painters and decorators with five years' experience who require a fast-track route to obtaining an NVQ qualification, leading to gaining the appropriate CSCS card. It is available to experienced workers who do not require any further training. This assessment method combines the use of witness testimonies, employer endorsement, practical assessment, professional discussion and underpinning knowledge questions.

Entry requirements:

- Have five or more years' experience in painting and decorating, carpentry or bricklaying
- Be able to provide witness testimonies
- Be able to provide evidence of your working history within the industry
