

My Journey

Student to Apprentice

**MORGAN
SINDALL**
CONSTRUCTION

This is Harmoni, who was recently a College student, *just like you*.

In September 2020, Harmoni joined Morgan Sindall as an Apprentice Quantity Surveyor and is currently studying a Bachelor of Science Honours Degree in Quantity Surveying at Anglia Ruskin in Chelmsford.

Harmoni, commenting on her journey with Morgan Sindall:

"I was first introduced to Helen Clements at a college careers event in 2019, where I talked to her about the apprenticeship programmes that Morgan Sindall offer. Helen offered me work experience on site to see what the job role of a Quantity Surveyor entailed. I was hesitant at first, but she persuaded me and told me how good this opportunity was, so I went for it.

Before being introduced to Morgan Sindall, I was interested in accountancy and was planning to do this after my business studies course. However, I soon realised the similarities between accountancy and Quantity Surveying. There was so much more to the role of a Quantity Surveyor than I'd expected. I didn't have a construction background, but carrying out work experience helped me when applying for the role".

Helen Clements, Community Investment Advisor at Morgan Sindall:

"Meeting Harmoni at her Colchester Institutes progression evening back in 2019, is exactly why we attend these events. She really wasn't sure how she wanted to use her qualification, and by attending the event, got the chance to hear about the construction industry and the opportunities that it has to offer. She met one of our Apprentice Quantity Surveyors at the event and got to hear from them the reality of the apprenticeship. This led to her wanting to find out more, so I organised a work experience placement on a local project for her."

What is a Quantity Surveyor (QS)?

A QS is a construction industry professional that calculates the amount of materials needed for building work, and how much they will cost.

Employer comment:

"Harmoni joined us for a number of days work experience at our Lexden Springs SEND School project, where she quickly showed the ability to understand and complete tasks efficiently. It was clear she wanted to focus on Surveying, and now that she has joined us full time, she will be able to continue to develop her skills and knowledge to progress within the business."

► *Talented people are key to our success*

A final word from Harmoni...

"Morgan Sindall have been very accommodating and have made me feel so welcome, involving me in everything that happens day to day. So far, I have enjoyed working closely with a Quantity Surveyor on a new job and seeing the variety of their role. I would highly recommend doing an apprenticeship as it helps you to fully understand the role and enables you to see it in the workplace."
